IBM SkillsBuild For Academia Masterclass 5

Project discussion and guidelines

A free digital learning platform empowering students with future-ready skills.

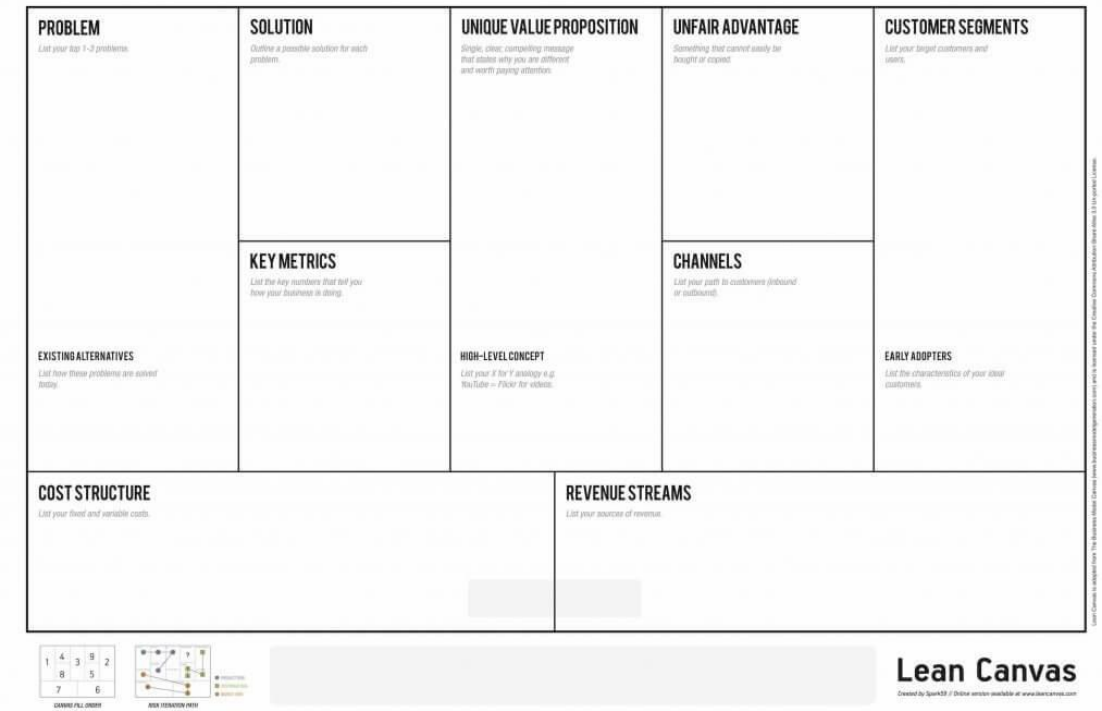

What You will learn Today

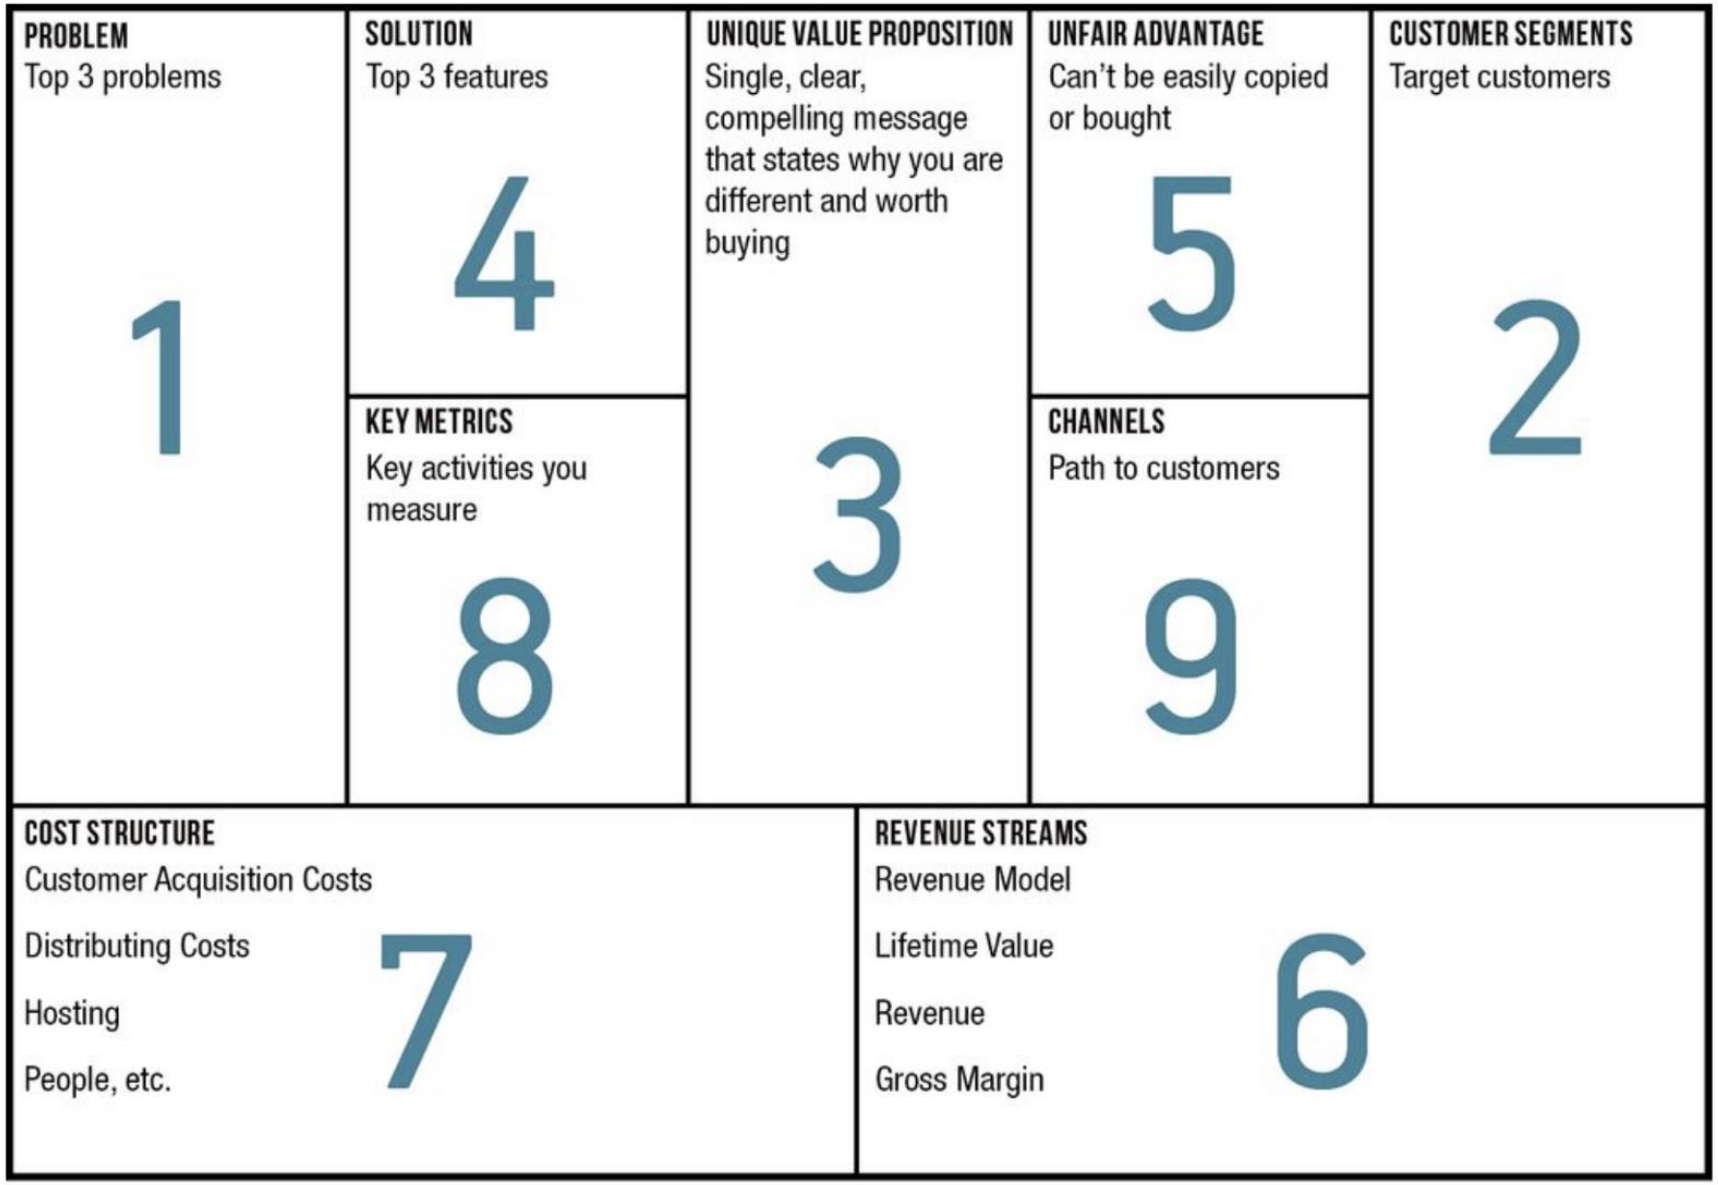

1. Project Discussion and what to build
2. Building a Lean Canvas
3. Deliverables and submissions

SUSTAINABLE DEVELOPMENT GOALS
1 NO POVERTY
2 ZERO HUNGER
3 GOOD HEALTH AND WELL-BEING
4 QUALITY EDUCATION
5 GENDER EQUALITY
6 CLEAN WATER AND SANITATION
7 AFFORDABLE AND CLEAN ENERGY
8 DECENT WORK AND ECONOMIC GROWTH
9 INDUSTRY, INNOVATION AND INFRASTRUCTURE
10 REDUCED INEQUALITIES
11 SUSTAINABLE CITIES AND COMMUNITIES
12 RESPONSIBLE CONSUMPTION AND PRODUCTION
13 CLIMATE ACTION
14 LIFE BELOW WATER
15 LIFE ON LAND
16 PEACE, JUSTICE AND STRONG INSTITUTIONS
17 PARTNERSHIPS FOR THE GOALS

Why Lean Canvas?

A one-page business model that helps you:
Identify the problem
Validate assumptions
Build faster
Improve through iteration

PROBLEM

LEAN CANVAS

A Simple Business Plan on One Page

1. PROBLEM

What problem are you trying to solve?

- List the top 1–3 problems your customers face.
- Focus on real problems that hurt them.

Example: Students don't get personalized help to learn AI.

2. CUSTOMER SEGMENTS

Who will use or buy your product?

- Primary users – the main people who will use it.
- Early adopters – people who will try it first.

Example: College students, AI learners, schools, teachers.

3. UNIQUE VALUE PROPOSITION

Why will people choose your solution over others?

Write ONE clear sentence that explains the biggest value you provide.

Example: An AI mentor that gives personalized learning, quizzes, career guidance and learns new things daily.

4. SOLUTION

How will you solve the problem?

- List the top features of your product.
- Focus on how these features solve the customer's problem.

Example: Personalized lessons, quizzes, reminders, career guidance, daily AI updates.

5. CHANNELS

How will customers find and use your product?

- Where will you reach your customers?
- How will you deliver your product to them?

Example: Website, mobile app, colleges, social media, email, WhatsApp.

6. REVENUE STREAMS

How will you make money?

- Ways you will earn money from your product.
- Can be more than one type.

Example: Subscription plans, premium courses, institutional licenses, certifications.

7. COST STRUCTURE

What are the main costs to build and run your product?

- List major costs.
- Focus on the most important expenses.

Example: Development, cloud services, AI APIs, team, marketing, customer support.

8. KEY METRICS

How will you measure if your product is successful?

- List the key numbers that show progress.
- Helps you track growth and improve.

Example: Active users, lessons completed, quiz scores, retention rate, revenue.

9. UNFAIR ADVANTAGE

What makes your product difficult for others to copy?

- What unique strength, technology, data or partnership do you have?
- This gives you a long-term edge over competitors.

Example: AI agents that update learning content daily and personalized guidance.

10. HIGH-LEVEL CONCEPT

Explain your idea in one simple sentence or compare it to something people already know.

Example: "Duolingo + ChatGPT for AI education."

⭐ **TIP:** Keep it simple, clear and focused on your customer's value. | ❤️ **Remember:** This is not a final plan. It is a living document. Keep testing and improving!

Example Today:

SDG 4
Quality Education

The Problem

Traditional education is often **one-size-fits-all, static, and unable to keep pace with rapidly evolving technologies**. Learners struggle to find reliable resources, stay motivated, receive personalized guidance, and connect their learning with real-world career opportunities, resulting in low engagement and skill gaps.

Question

How can AI help?

SkillPilot AI

An **Agentic AI learning platform** that acts as a personal mentor for every learner—creating personalized learning paths, continuously updating content from the latest knowledge, assessing progress, providing career guidance, and keeping students engaged through intelligent reminders and adaptive support, making high-quality education more accessible, personalized, and effective.

PROBLEM

List your top 1-3 problems.

EXISTING ALTERNATIVES

List how these problems are solved today.

SOLUTION

Outline a possible solution for each problem.

KEY METRICS

List the key numbers that tell you how your business is doing.

UNIQUE VALUE PROPOSITION

Single, clear, compelling message that states why you are different and worth paying attention.

HIGH-LEVEL CONCEPT

List your X for Y analogy e.g. YouTube = Flickr for videos.

UNFAIR ADVANTAGE

Something that cannot easily be bought or copied.

CHANNELS

List your path to customers (inbound or outbound).

CUSTOMER SEGMENTS

List your target customers and users.

EARLY ADOPTERS

List the characteristics of your ideal customers.

COST STRUCTURE

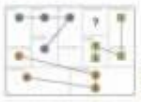

List your fixed and variable costs.

REVENUE STREAMS

List your sources of revenue.

Problem

AI learning resources are scattered across multiple platforms.

Students struggle to maintain consistency in learning.

Learning is not personalized to individual career goals.

AI technology evolves rapidly, making courses outdated.

Most online courses have low completion rates due to lack of accountability.

Students lack mentors for career guidance in AI.

Existing Alternatives

YouTube, Coursera, Udemy, IBM SkillsBuild, ChatGPT, Google Search, LinkedIn Learning

Customer Segments

Primary Customers

College students
Engineering students
Non-technical learners interested in AI
Government skill development programs
Universities
CSR-funded education initiatives
Schools introducing AI

Early Adopters

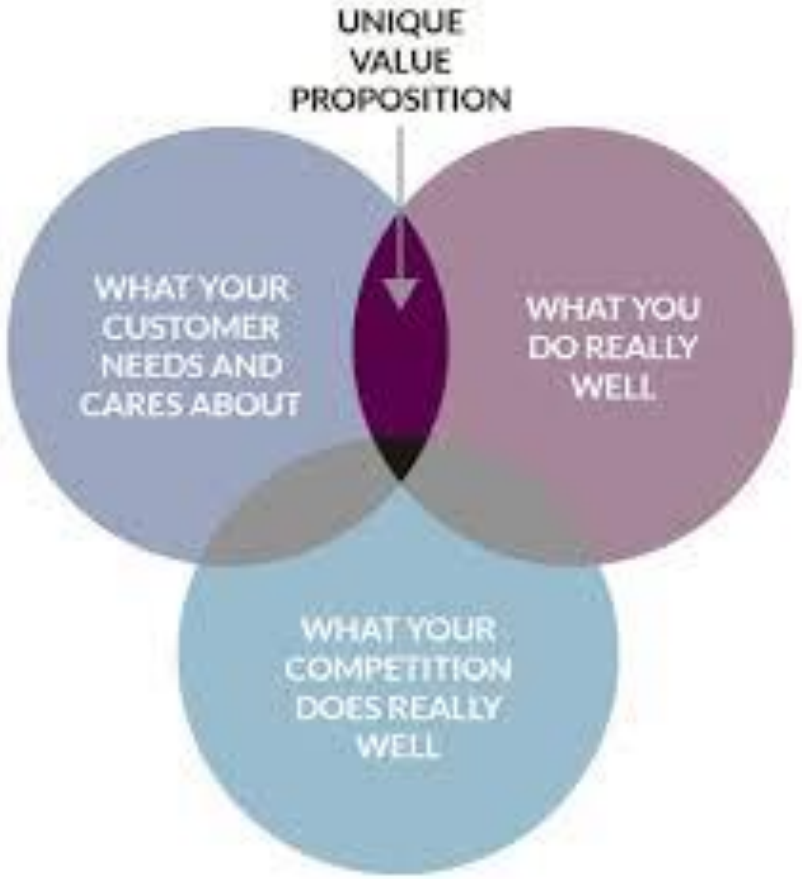

AI clubs
Students preparing for AI careers
Lenovo Leap participants
IBM SkillsBuild learners
Colleges with AI labs

Unique Value Proposition

"Your Personal AI Learning Companion that Learns, Teaches, Motivates, and Evolves Every Day."

Instead of static courses, every learner gets an intelligent AI mentor that:
Creates personalized learning journeys
Learns from the latest AI developments daily
Sends reminders automatically
Tracks learning progress
Recommends projects
Prepares students for AI careers

"Duolingo + ChatGPT + Coursera + Personal Career Coach for AI Education."

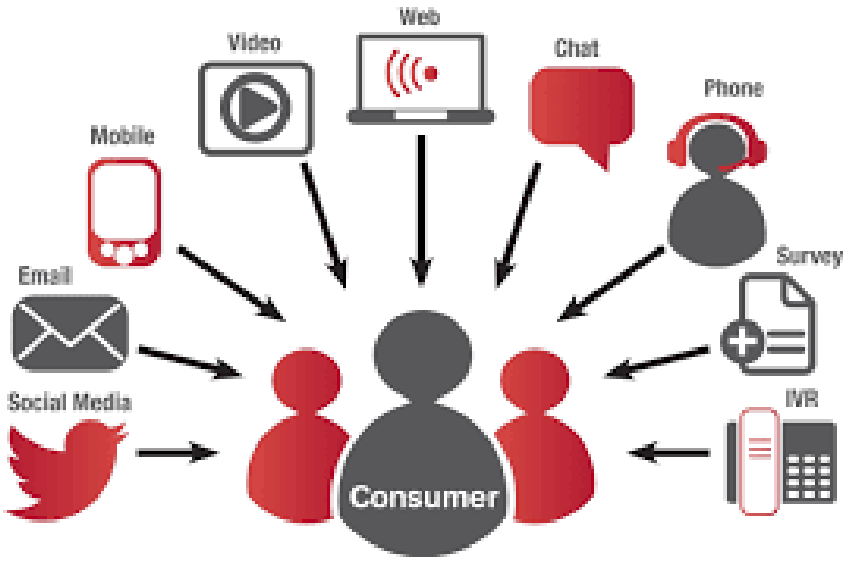

Solution

1. **Personalized Learning Paths** – Generate AI learning roadmaps based on skill level and career goals.
2. **AI Tutor** – Provide instant explanations, examples, and doubt resolution.
3. **Adaptive Assessments** – Deliver quizzes that adjust to learner performance.
4. **Career Guidance** – Recommend AI career paths, required skills, projects, and certifications.
5. **Daily AI Knowledge Updates** – Automatically gather the latest AI news, research papers, and technology trends.
6. **Content Generation** – Convert new AI developments into simplified lessons, summaries, and quizzes.
7. **Learning Reminders** – Send personalized reminders via WhatsApp and email to encourage consistent learning.
8. **Progress Tracking** – Monitor learning progress, streaks, strengths, and areas for improvement through dashboards.
9. **Project & Skill Recommendations** – Suggest hands-on projects, coding exercises, and portfolio-building activities.
10. **Multi-Agent Learning Assistant** – Coordinate specialized AI agents (Tutor, Researcher, Career Coach, Quiz Master, and Reminder Agent) to provide an end-to-end personalized learning experience.

Key Metrics

Daily Active Learners (DAU) – Number of students actively learning each day.
Course/Learning Path Completion Rate – Percentage of learners completing assigned modules.
Quiz Performance & Knowledge Improvement – Average quiz scores and improvement over time.
Learning Consistency (Streaks) – Number of consecutive days learners stay active.
Reminder Engagement Rate – Open and response rates for WhatsApp and email reminders.
Content Freshness – Number of new AI learning modules automatically generated from daily web updates.
Learner Retention Rate – Percentage of users returning after 7, 30, and 90 days.
Career Readiness – Projects completed, skills mastered, certifications earned, or interview readiness scores.
Student Satisfaction (NPS/Feedback Score) – Learner ratings and feedback on the platform.
Institutional Adoption – Number of schools, colleges, CSR programs, or organizations using the platform.

Unfair Advantage

Autonomous AI agents continuously updating content from trusted sources.
Personalized learning paths that adapt to each student's goals and progress.
Integrated tutor, mentor, career coach, researcher, and accountability partner in one platform.
Daily conversion of AI news and research into learner-friendly lessons and quizzes.
Multi-channel engagement through WhatsApp, email, and web notifications.
Alignment with **UN Sustainable Development Goal 4 (Quality Education)**, making the platform attractive for educational institutions, CSR programs, and governments.

SDG : Problem Ideas

SDG	Problem	Agentic AI Solution
SDG 2 – Zero Hunger	Food wastage	Food redistribution agent
SDG 3 – Good Health	Missed medication	AI Health Companion
SDG 4 – Quality Education	Student dropouts	AI Learning Mentor
SDG 6 – Clean Water	Water quality monitoring	Water Monitoring Agent
SDG 8 – Decent Work	Skill-job mismatch	AI Career Advisor
SDG 11 – Sustainable Cities	Traffic congestion	Traffic Optimization Agent
SDG 12 – Responsible Consumption	Household waste	Waste Segregation Agent
SDG 13 – Climate Action	High energy consumption	Energy Optimization Agent
